

Vibra-Tector™

Pulse Induction Metal Detector 740

Designed For Any Environment!

The Vibra-Tector 740 is our latest state of the art handheld metal detector. It communicates to the user with pulses of vibration and bright LED light.

The unique sealed design is waterproof to a depth of 100 ft (30 m), and the self calibrating microprocessor controlled circuitry requires no adjustments of any kind.

The Vibra-Tector incorporates Pulse Induction (PI) technology. This allows hunting in any environment including grass, mud, dirt, sand, black sand, and fresh or salt water.

The 4 inch coil, and overall compact size, makes the Vibra-Tector perfect for travel. It's a great all around metal detector for diving, snorkeling, or searching small areas.

Our detectors have no push buttons that can break. Instead they feature our unique tilt-on / tilt-off design that allows quick activation and unlimited detecting in any environment.

The Vibra-Tector 740 also includes a removable and adjustable wrist strap for added security.

Features

- **Communicates with vibration & light** - When a target is located the Vibra-Tector signals with pulses of vibration and flashes of bright light from a white LED.
- **Pulse Induction (PI)** - This technology allows hunting at the beach in salt water or in any type of soil, including black sand.
- **Detection depth stability** - New advanced circuitry maintains the detectors detection depth ability throughout the life of the battery.
- **Target distancing** - The pulses of vibration and light will continue to increase in quantity as the coil gets closer to the target.
- **Automatic tuning** - The state of the art microprocessor controlled design requires no adjustments of any kind.
- **Tilt On/Off** - The Vibra-Tector uses an easy tilt on/off system that eliminates the need for fragile push button switches.
- **Waterproof** - Unique sealed design can be used in almost any environment including fresh or salt water to a depth of 100 feet. This makes the Vibra-Tector an ideal tool for divers or the beach.
- **Low battery indicator** - Built in low battery sensor alerts you when the battery is low and needs replacing.
- **Easy battery installation** - The standard nine-volt battery is quickly changed without tools. Simply rotate the rear knob and pull out the compression seal to access the battery compartment.
- **Compact design** - Because of its compact 4 inch coil, and small overall size, the Vibra-Tector is easy to carry and can fit in almost any small suitcase or backpack for travel.
- **Solid construction** - The Vibra-Tector's rugged sealed construction and stainless steel hardware are built to last.
- **Wrist strap & D-ring** - Included is an adjustable wrist strap for added security, and a D-ring to attach to any common belt clip.
